"The continuity of the tone across and up and down the fret board is impressive...great chord sound."

— Al Shaffer

Ball String End

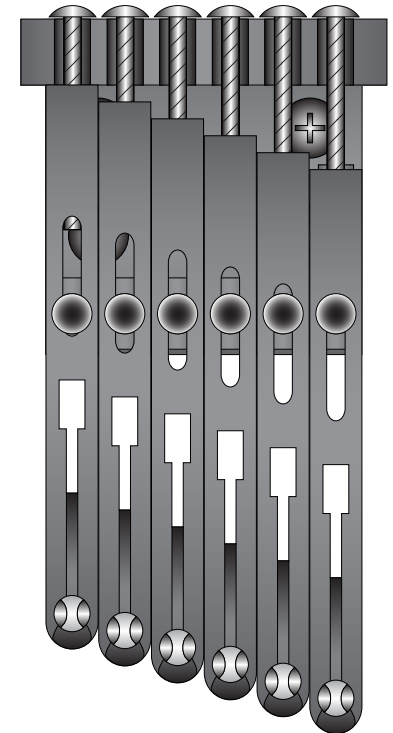

Plain String End

Intonation Adjustable Nut — Individual string control over both string height and intonation. Use with multi-scale (fanned-fret) or conventional guitars. Modular design for unlimited string configurations.

Compact — Lightweight and precise. Machined from solid structural aircraft grade aluminum with stainless steel screws.

String Options — Plain or ball string ends. Use nylon, bronze, or steel strings. Tool-free string changes for ball string ends.

SCALE = 1:1
